1. Question

Object detection can be seen as a specialized form of image classification.

○ False

● **True**

Correct

2. Question

The goal of object detection is to report the location and size of a given object in an image.

○ False

● **True**

Correct

3. Question

The primary difference between object detection and image classification is:

● **Image classification attempts to classify the *entire* contents of an image, while object detection seeks to localize specific objects in *part* of an image.**

○ Image classification seeks to find specific objects in a *portion* of the image, while object detection attempts to classify the *entire* contents of an image.

○ There is no difference between object detection and image classification.

Correct
